Fire Extinguisher, Emergency Evacuation Training & Online Training

Fire & Emergency Training

We offer many types of Fire & Emergency Training:

- Basic Fire Extinguisher Training
- Specialised Fire Training specific to your needs
- Trial Evacuation Training
- Training on Fire Protection, Detection and Staged Evacuation systems
- Live use of Fire Extinguishers and Hose Reels on our Simulator
- Online Fire and Warden Training

Benefits of Fire Simulator

- Safe and environmentally friendly (LPG fired)
- Fully mobile so we can come to you
- No noise, disruption or danger to surrounding areas
- Allows staff/students to use and feel a fire extinguisher on a live fire
- Staff/Students can visually see how a fire behaves and what heat is released
- A multitude of props to simulate different fire and evacuation situations

Fire Extinguisher Training - Face to Face

We visit site with the Live Fire Training Simulator and carry out a PowerPoint presentation and a theory session based on the Principles of Fire, Types of Fire and Suppression Methods, Fire Hazards, Dangerous Goods, Evacuation, Basic Fire Safety and Basic Emergency Management. A practical session is then held where attendees can use a CO2 Extinguisher and a fire hose reel and we will demonstrate other types. The training is then completed with time for Q & A and each attendee receives a training manual and certificate. Theory and practical will take approx. 2-2.5 hours and we will provide all equipment for the training.

Advantages of Online Training

Scalable, efficient and fast

E-learning gives you the ability to quickly communicate new policies and training to your team. Your employees results are tracked and reported back to you, and a certificate is available for your employees after successfully completing each quiz.

Capacity and consistency

E-learning offers the ability to achieve high levels of coverage amongst your team and ensures that the message communicated is consistent. This means all learners get the same quality training.

Higher learning retention

Well-designed online courses can cater to various learning styles of learners by providing more than one way to learn or assimilate content. There's also the added ability to refresh or update coursework whenever it's needed and learn at a pace that suits your team.

Reduce your carbon footprint

With your team receiving their training online, you're providing alternatives to paper-based forms of learning and testing. All workbooks and reference material will be able to be stored electronically, or can be printed if needed.

E-learning saves time and money!

It reduces time away from the workplace, cuts down on expensive travel and reduces training costs.

Flexibility

E-learning can give your employees the freedom to learn when and where they want, and at their own pace. Learners who travel frequently, such as sales people can even access courses on their mobile devices, thus enabling learning on the go.

Warden Training - Face to Face

The Warden Training programs are usually completed on your site in one of your training rooms.

We will present a PowerPoint presentation along with interactive learning to ensure the information is in line with your in-house procedures while also meeting legal requirements. Our detailed Fire Warden Training will take approx. 2-2.5 hours and will cover all aspects of evacuation, planning, drills, notification, legislation, fire and safety systems, disabled persons, signage, dangerous goods and the NZ Fire Service. The training is then completed with time for Q & A and each attendee receives a training manual and certificate.

Tailored Online Training Options: Fire Warden, Fire Suppression, Emergency Procedures and more

The Building and Fire Services Ltd Online Training is the new and innovative way to train yourself and/or your company. It can be used in a number of ways such as an initial beginner course or a refresher course. With specialised content for different industries including Forestry, Childcare, Hospitality and many more, we can structure the online course to meet your requirements. There are three training packages which cover Fire Suppression, Fire Warden and Emergency Procedures. The course has reading material as well as a quiz at the end to ensure the student has learnt the course content. Once completed the student will get a certificate. With assistance enrolling and throughout the course, it makes it easy to complete and hassle free.

Trial Evacuation Training

Basic Fire Extinguisher Training

Specialised Fire Training

Times tailor made to suit your needs

We can tailor make any course to suit your needs

Building and Fire Services have NZQA Qualified Staff with extensive Fire Industry experience.

We are familiar with all aspects of the fire evacuation and fire extinguisher training fields. We have in place all training materials, props and templates to complete a comprehensive training tailor made to suit all individual requirements of the client.

Our Live Fire Simulator offers staff a chance to be interactive and use a fire extinguisher on a real fire situation.

If you are interested in discussing this further we are happy to meet with you and carry out a free, no obligation, fire safety appraisal of your workplace or business.

Unit standard Fire Training can be delivered on request.
